Geophysical Journal subject index 1985

Aeromagnetics

Interpretation of aeromagnetic data across the central crystalline shield area of Nigeria (Ajakaiye, D.E., Hall, D.H., Millar, T.W.), **83**, 503

Africa

A seismic refraction study of the crustal structure associated with the Adamawa Plateau and Garoua Rift, Cameroon, West Africa (Stuart, G.W., Fairhead, J.D., Dorbath, L., Dorbath, C.), **81**, 1
Lithospheric structure beneath the Kenya Dome (Savage, J.E.G., Long, R.E.), **82**, 461

Algeria

Control of rupture by fault geometry during the 1980 El Asnam (Algeria) earthquake (Yielding, G.), **81**, 641

Anisotropy

Seismic *P*-wave anisotropy in the subcrustal lithosphere of north-west Australia (Drummond, B.J.), **81**, 497
Analysis of records of local earthquakes: the Turkish Dilatancy Projects (TDP1 and TDP2) (Crampin, S., Evans, R., Uçer, S.B.), **83**, 1
The MARNET radiolinked seismometer network spanning the Marmara Sea and the seismicity of Western Turkey (Ucer, S.B., Crampin, S., Evans, R., Miller, S., Kafadar, N.), **83**, 17
Shear-wave polarizations near the North Anatolian Fault - I. Evidence for anisotropy-induced shear-wave splitting (Booth, D.C., Crampin, S., Evans, R., Roberts, G.), **83**, 61
Shear-wave polarizations near the North Anatolian Fault - II. Interpretation in terms of crack-induced anisotropy (Crampin, S., Booth, D.C.), **83**, 75
Partial derivatives of surface wave phase velocities for flat anisotropic models (Maupin, V.), **83**, 379

Antarctica

A confirmed earthquake in continental Antarctica (Adams, R.D., Hughes, A.A., Zhang, B.M.), **81**, 489

Asteroidal collisions

Cosmic spherules, asteroidal collisions and the possibility affecting changes in the solar constant (Parkin, D.W.), **83**, 683

Asthenosphere

Inversion of multimode surface wave data: evidence for sub-lithospheric anisotropy (Lévêque, J.-J., Cara, M.), **83**, 753

Atlantic

Source process and tectonic implications of the great 1975 North Atlantic earthquake (Lynnes, C.S., Ruff, L.J.), **82**, 497

Atmospheric pressure waves

Excitation mechanism of atmospheric pressure waves from the 1980 Mount St Helens eruption (Mikumo, T., Bolt, B.A.), **81**, 445

Australia

Holocene geomagnetic secular variation records from north-eastern Australian lake sediments (Constable, C.G., McElhinny, M.W.), **81**, 103
Eastern Australian geomagnetic field intensity over the past 14000 yr (Constable C.G.), **81**, 121
Seismic *P*-wave anisotropy in the subcrustal lithosphere of north-west Australia (Drummond, B.J.), **81**, 497
Erosion-isostatic rebound models for uplift: an application to south-eastern Australia (Stephenson, R., Lambeck, K.), **82**, 31
Late Mesozoic and Cenozoic palaeomagnetism of Australia - I. A redetermined apparent polar wander path (Idnurm, M.), **83**, 399
Late Mesozoic and Cenozoic palaeomagnetism of Australia - II. Implications for geomagnetism and true polar wander (Idnurm, M.), **83**,419

Canada

Regional variations of heat flow differences with depth in Alberta, Canada (Majorowicz, J.A., Jones, F.W., Lam, H.-L., Jessop, A.M.), **81**, 479
Post-tectonic magnetizations from the Cordova gabbro, Ontario and Palaeozoic reactivation in the Grenville Province (Dunlop, D.J., Stirling, J.M.), **81**, 521

China

The utility of regional Chinese seismograms for source and path studies in central Asia (Patton, H.J., Taylor, S.R., Harris, D.B., Mills (Jr), J.M.), **81**, 469

Convection

Finite element calculations of very high Rayleigh number thermal convection (Shubert, G., Anderson, C.A.), **80**, 575
The destruction of geochemical heterogeneities by differential fluid motions during mantle convection (Hoffman, N.R.A., McKenzie, D.P.), **82**, 163

Core

On the separation of core and crustal contributions to the geomagnetic field (Szeto, A.M.K., Cannon, W.H.), **82**, 319

Crust

On the separation of core and crustal contributions to the geomagnetic field (Szeto, A.M.K., Cannon, W.H.), **82**, 319

Crustal structure

A seismic refraction study of the crustal structure associated with the Adamawa Plateau and Garoua Rift, Cameroon, West Africa, (Stuart, G.W., Fairhead, J.D., Dorbath, L., Dorbath, C.), **81**, 1
A geomagnetic induction anomaly from IMS data near Hudson Bay, and its relation to crustal electrical conductivity in central North America (Gupta, J.C., Kurtz, R.D., Camfield, P.A., Niblett, E.R.), **81**, 33
On the thermal structure of the southern Tibetan crust (Jaupart, C., Francheteau, J., Shen, X.-J.), **81**, 131
Inversion of seismic refraction data in planar dipping structure (Milkereit, B., Mooney, W.D., Kohler, W.M.), **82**, 103
Upper crustal shear velocity models from higher mode Rayleigh wave dispersion in Scotland (MacBeth, C.D., Burton, P.W.), **83**, 519

Crustal studies

Waveform inversion of seismic refraction data and applications to young Pacific crust (Shaw, P.R., Orcutt, J.A.), **82**, 375
A study of the physics of telluric current flow at very low frequencies in the Earth's crust (Mosnier, J.), **82**, 479

Drilling-induced remanence

Drilling-induced remanence in carbonate rocks: occurrence, stability and grain-size dependence (Jackson, M., Van der Voo, R.), **81**, 75

Earth models

Modes to replace transitional asymptotic ray fields in a vertially inhomogeneous earth model (Niver, E., Felsen, L.B.), **80**, 289

Earth tides

Anomalies of some tidal waves of UT1 (Capitaine, N., Guinot, B.) **81**, 563

Earth's core

Internal oscillations in the Earth's fluid core (Friedlander, S.), **80**, 345
Geomagnetic field analysis – III. Magnetic fields in the coremantle boundary (Gibbins, D. Bloxham, J.), **83**, 299

Earth's crust

Mapping of crustal heterogeneity in the North Sea basin via the propagation of *Lg*-waves (Kennert, B.L.N., Gregerson, S. Mykkeltveit, S., Newmark, R.), **83**, 299

Earth's lithosphere

A numerical study on the determination of the 3-D structure of the lithosphere by linear and non-linear inversion of teleseismic travel times (Koch, M.), **80**, 73
The dynamics of rifting: deformation of the lithosphere by active and passive driving forces (Keen, C.E.), **80**, 95
Thick-plate flexure re-examined (Wolf, D.), **80**, 265
Surface wave dispersion, crustal structure, and sediment thickness variation across the Barents shelf (Chan, W.W., Mitchell, B.J.), **80**, 329
Anisotrophy in the oceanic lithosphere – theory and observations from the Ngendei seismic regration experiment in the south-west Pacific (Shearer, P., Orcutt, J.) **80**, 493

Earth's magnetic field

Geomagnetic field analysis – III. Magnetic fields on the core-mantle boundary (Gubbins, D., Bloxham, J.), **80**, 695
Non-linear processes in the geodynamo: palaeomagnetic evidence (McFadden,P.L., Merrill, R.T., McElhinny, M.W.), **83**, 111

Earth's mantle

Formation and growth of deep mantle plumes (Boss, A.P., Sacks, S.I.), **80**,241
Geomagnetic field analysis – lll. Magnetic fields on the core-mantle boundary (Gubbins, D., Bloxham, J.), **80**, 695

Earth's rotation

The secular acceleration of the Earth's spin (Newton, R.L.), **80**, 313
Discrete polar motion equations (Wilson, C.R.) , **80**, 551
Comments on 'Pleistocene deglaciation and the Earth's rotation: a new analysis', by P. Wu and W.R. Peltier (Sabadini, R., Tuen, D.A., Boschi, E.), **83**, 555
Reply to 'Comments on 'Pleistocene deglaciation and the Earth's rotation: a new analysis' by Wu and Peltier' by Sabadini, Yuen and Boschi (wu, P.) , **83**, 559

Earthquakes

The evolution of the Gulf of Corinth (Greece): an aftershock study of the 1981 earthquakes, (King, G.C.P., Ouyand, Z.X., Papadimitriou, P., Deschamps, A., Gagnepain, J., Houseman, G., Jackson, J.A., Soufleris, C., Virieus, J.), **80**, 677
Confirmed earthquake in continental Antarctica (Adams, R.D., Hughes, A.A., Zhang, B.M.), **81**, 489
A seismological study of normal faulting in the Demirci, Alaşehir, and Gediz earthquakes of 1969-70 in western Turkey: implications for the nature and geometry of deformation in the continental crust (Eyidoğan, H., Jackson, J.), **81**, 569
Control of rupture by fault geometry during the 1980 El Asnam (Algeria) earthquake (Yielding, G.), **81**, 641
Source process and tectonic implications of the great 1975 North Atlantic earthquake (Lynnes, C.S., Ruff, L.J.), **82**, 497
Estimating maximum magnitude earthquakes in Iraq using extreme value statistics (Al-Abbasi, J.N., Fahmi, K.J.), **82**, 535
Tectonics of the Marmara Sea region of Turkey: new evidence from micro-earthquake fault plane solutions (Evans, R., Asudeh, I., Crampiin, S., Üçer, S.B.), **83**, 47
The great British earthquake of 1984 seen from afar (Trodd, H., Warburton, P., Pooley, C.I.), **83**, 809

Earthquake mechanisms

Asperity models and characteristic earthquakes (Lomnitz-Adler, J.), **83**, 435
Source mechanisms and focal depths of East African earthquakes using Rayleigh-wave inversion and body-wave modelling (Shudofsky, G.N.), **83**, 563
Quasi-static crack models and the frictional stress threshold criterion for slip arrest (Bonafede, M., Dragoni, M., Boschi, E.), **83**, 625
The two-point correlation function of the seismic moment tensor (Kagan, Y.Y., Knopoff, L.), **83**, 637
Focal mechanisms of aftershocks of the 1979 Carlisle earthquake: a re-interpretation (Marrow, P.C., Roberts, G.), **83**, 797

East Africa

Source mechanisms and focal depths of East African earthquakes using Rayleigh-wave inversion and body-wave modelling (Shudofsky, G.N.), **83**, 563

Elasticity

Thick-plate flexure re-examined (Wolf, D.), **80**, 265
On Boussinesq's problem for Maxwell continua subject to an external gravity field (Wolf, D.), **80**, 275

Elastic wave theory

Kirchhoff-Helmholtz reflection seismograms in a laterally inhomogeneous multi-layered elastic medium – I. Theory (Fraser, L.N., Sen, M.K.), **80**, 121
Modes to replace transitional asymptotic ray fields in a vertially inhomogeneous earth model (Niver, E., Kamel, A., Felsen, L.B.), **80**, 289
Shear-coupled *PL* (Baag, C.-B., Langston, C.A), **80**, 363
A WKBJ spectral method for computation of *SV* synthetic seismograms in a cylindrically symmetric medium, (Baag, C.-E., Langston, C.A.), **80**, 387
A new class of propagation models based on a factorization of the Helmholtz equation (Fishman, L., McCoy, J.L.), **80**, 439

Elastodynamics

The determination of a layered acoustic medium via multiple impedance profile inversions from plane wave responses (Santosa, F., Symes, W.W.), **81**, 175
Application of the Gaussian beam method to elasticity theory (Katchalov, A.P., Popov, M.M.), **81**, 205
Elastic radiation from explosively loaded ellipsoidal cavities in an unbounded medium (Glenn, L.A., Ladd, A.J.C., Moran, B., Wilson, K.A.), **81**, 231
The elastodynamic near field (Wu, R.-S., Ben-Menahem, A.), **81**, 609
Range of validity of seismic ray and beam methods in general inhomogeneous media – I. General theory (Ben-Menahem, A., Beydoun, W.B.), **82**, 207
Range of validity of seismic ray and beam methods in general inhomogeneous media – ll. A canonical

problem (Beydoun, W.B., Ben-Menahem, A.), **82**, 235
Gaussian beams, complex rays, and the analytic extension of the Green's function in smoothly inhomogeneous media (Wu, R.-S.), **83**. 93
An introduction to Maslov's asymptotic method (Thomson, C.J., Chapman, C.H.), **83**, 143

Electrical methods and surveys

Electrical conductivity anomalies and their relationship with the tectonics of South Australia (White, A., Polatayko, O.W.), **80**, 757

Electrical properties

Electrical conductivity anomalies and their relationship with the tectonics of South Australia (white, A., Polatayko, O.W.), **80**, 757

Electromagnetic induction

Induction in a thin sheet of variable conductance at the surface of a stratified earth - II. Three-dimensional theory (McKirdy, D. McA., Weaver, J.T., Dawson, T.W.), **80**, 177
Significance of the sign changing of the imaginary arrows in geomagnetic induction investigation (Chen, P.F., Fung, P.C.W.), **80**, 257
UT variation of internal Sq currents and the oceanic effect during 1980 March 1-18 (Takeda, M.), **80**, 649
Forerunners on conducting surfaces: the infinitesimal vertical magnetic dipole with displacement terms (Weir, G.J.), **81**, 19
The response of a three-dimensional magnetic and conductive body in shallow depth electromagnetic prospecting (Tabbagh, A.), **81**, 215
Processing electromagnetic data in the time domain (McMechan G.A., Barrodale, I.), **81**, 277
The Backus–Gilbert theory for piecewise continuous structures with variable discontinuity levels and its application to the magnetotelluric inverse problem (Abramovici, F., Baumgarten, J.), **81**, 347
Transient electromagnetic field above a permeable and conducting half-space (Ignetik, R., Thio, Y.-C., Westfold, K.C.), **81**, 623
A comparison of analytic and numerical results for a two-dimensional control model in electromagnetic induction – I. *B*-polarization calculations (Weaver, J.T., Le Quang, B.V., Fisher, G.), **82**, 263
The magnetic field of an infinite plane current sheet uniform except for two circular insertions of different uniform conductivities (Ashour, A.A.), **83**, 127

Fracture and failure

An elliptical asperity in shear: fracture process and seismic radiation (Das, S., Kostrov, B.V.), **80**, 725

Free oscillations of earth

Internal oscillations in the Earth's fluid core (Friedlander, S.), **80**, 345

Geochemistry

The destruction of geochemical heterogeneities by differential fluid motions during mantle convection (Hoffman, N.R.A., McKenzie, D.P.), **82**, 163

Geoid

The relationship between gravity and bathymetry in the Pacific Ocean (Watts, A.B., McKenzie, D.P., Parsons, B.E., Roufosse, M.), **83**, 263

Geomagnetic induction

A geomagnetic induction anomaly from IMS data near Hudson Bay, and its relation to crustal electrical conductivity in central North America (Gupta, J.C., Kurtz, R.D., Camfield, P.A., Niblett, E.R.), **81**, 33

Geomagnetic sounding

A geomagnetic scattering theory for evaluation of earth structure (Kuckes, A.F., Nekut, A.G., Thompson, B.G.), **83**, 319

Geomagnetism

On the separation of core and crustal contributions to the geomagnetic field (Szeto, A.M.K., Cannon, W.H.), **82**, 319

Gradiometer

A matrix representation of the potential second-rank gradient tensor for local modelling (Soler, T.), **81**, 363
Tidal and rotational perturbations of Earth's gravity gradients (Bucchio, F.), **81**, 463

Grain-size distribution

Characterization of fine magnetic grains in sediments by suspension method (Yoshida, S., Katsura, I.), **82**, 301

Gravity

A matrix representation of the potential second-rank gradient tensor for local modelling (Soler, T.), **81**, 363

Tidal and rotational perturbations of Earth's gravity gradients (Bocchio, F.), **81**, 463
The relationship between gravity and bathymetry in the Pacific Ocean (Watts, A.B., McKenzie, D.P., Parsons, B.E., Roufosse, M.), **83**, 263

Heat flow

On the thermal structure of the southern Tibetan crust (Jaupart, C., Francheteau, J., Shen, X.-J.), **81**, 131
Regional variations of heat flow differences with depth in Alberta, Canada (Majorowicz, J.A., Jones, F.W., Lam, H.-L., Jessop, A.M.), **81**, 479
The effects of sedimentation and compaction on oceanic heat flow (Hutchison, I.), **82**, 439

Holocene

Holocene geomagnetic secular variation records from north-eastern Australian lake sediments (Constable, C.G., McElhinny, M.W.), **81**, 103

India

Palaeomagnetism and ages of dolerite dykes in Karimnagar District, Andhra Pradesh, India (Subba Rao, Y.V., Radhakrishna Murthy, I.V.), **82**, 331

Inverse problems and methods of inference

A numerical study on the determination of the 3-D structure of the lithosphere by linear and non-linear inversion of teleseismic travel times (Koch, M.), **80**, 73
Stability considerations for one-dimensional inverse problems (Gray, S.H., Symes, W.W.), **80**, 149
Extremal inversion of static earth displacements due to volume sources (Vasco, D.W., Johnson, L.R.), **80**, 223
The use of partitioned matrices in geophysical inversion problems (Spencer, C.), **80**, 619

Inverse theory

The Backus–Gilbert theory for piecewise continuous structures with variable discontinuity levels and its application to the magnetotelluric inverse problem (Abramovici, F., Baumgarten, J.), **81**, 347

Inversion

The determination of a layered acoustic medium via multiple impedance profile inversions from plane wave responses (Santosa, F., Symes, W.W.), **81**, 175
Inversion of a normally incident reflection seismogram by the Gopinath–Sondhi integral equation (Sarwar, A.K.M., Rudman, A.J.), **81**, 551
Inversion of seismic refraction data in planar dipping structure (Milkereit, B., Mooney, W.D., Kohler, W.M.), **82**, 103
The Backus–Gilbert approach to the three-dimensional structure in the upper mantle – I. Lateral variation of surface wave phase velocity with its error and resolution (Tanimoto, T.), **82**, 105
A practical solution for linear inference computations (Schlax, M., Oldenburg, D.W.), **83**, 331
Determination of the three-dimensional seismic structure of the crust and upper mantle in the Central Midlands of England (Maguire, P.K.H., Francis, D.J., Whitcombe, D.N.), **83**, 347

Ipod

Magnetic viscosity, diffusion aftereffect, and disaccommodation in natural and synthetic samples (Moskowitz, B.M.), **82**, 143

Isostatic rebound

Erosion-isostatic rebound models for uplift: an application to south-eastern Australia (Stephenson, R., Lambeck, K.), **82**, 31

Lateral inhomogeneities

Kirchhoff–Helmholtz reflection seismograms in a laterally inhomogeneous multi - layered elastic medium – II. Computations (Sen, M.K., Frazer, L.N.), **82**, 415

Lithosphere

The transition betweeen the Sheba Ridge and Owen Basin: rifting of old oceanic lithosphere (Stein, C.A., Cochran, J.R.), **81**, 47
Anisotropic propagation of *P*- and *S*-waves in the western Pacific lithosphere (Butler, R.), **81**, 89
Seismic *P*-wave anisotropy in the subcrustal lithosphere of north-west Australia (Drummond, B.J.), **81**, 497
Lithospheric structure beneath the Kenya Dome (Savage, J.E.G., Long, R.E.), **82**, 461
Seismic detection of the untransformed 'basaltic' oceanic crust subducting into the mantle (Hori, S., Inoue, H., Fukao, Y., Ukawa, M.), **83**, 169

Lower mantle

Evidence against a discontinuity at the top of *D*" (Schlittenhardt, J., Schweitzer, J., Müller, G.), **81**, 295

Magnetic anomalies

The transition betweeen the Sheba Ridge and Owen Basin: rifting of old oceanic lithosphere (Stein, C.A., Cochran, J.R.), **81**, 47

Magnetic field of earth

On 'The relationship between the magnitude and direction of the geomagnetic field during the late Tertiary in Eastern Iceland' (Roberts, N., Shaw, J., Kristjansson, L.), **80**, 555
Geomagnetic field analysis – III. Magnetic fields on the core-mantle boundary (Gubbins, D. Bloxham, J.), **80**, 695

Magnetic methods and surveys

The results of deep geomagnetic soundings in the West Carpathians (Jankowski, J., Tarlowski, Z., Praus, O., Pecova, J., Petr, V.), **80**, 561

Magnetic remanence

The angular dependence of rotational and anhysteretic remanent magnetization in rotating rock samples (Stephenson, A.), **83**, 787

Magnetic variations

The effect of disturbance on the day-to-day variability of *Sq* (Mann, R.J., Schlapp, D.M.), **80**, 535
UT variation of internal *Sq* currents and the oceanic effect during 1980 March 1-18 (Takeda, M.), **80**, 649

Magnetic viscosity

Magnetic viscosity, diffusion aftereffect, and disaccommodation in natural and synthetic samples (Moskowitz, B.M.), **82**, 143

Magnetohydrodynamics

Magnetic stratigraphy observed in ferromanganese crust (Chan, L.S., Chu, C.L., Ku, T.L.), **80**, 715

Magnetotellurics

A study of the physics of telluric current flow at very low frequencies in the Earth's crust (Mosnier, J.), **82**, 479

Magnetotelluric methods and surveys

Magnetotelluric soundings over a Precambrian contact in Australia (Cull, J.P.), **80**, 661

Mantle

The destruction of geochemical heterogeneities by differential fluid motions during mantle convection (Hoffman, N.R.A., McKenzie, D.P.), **82**, 163

Mantle convection

Viscosity profile of the lower mantle (Ellsworth, K., Schubert, G., Sammis, C.G.), **83**, 199

Mantle viscosity

A critical assessment of viscous models of trench topography and corner flow (Zhang, J., Hager, B.H., Raefsky, A.), **83**, 451
The deformation and compaction of partial molten zones (Ribe, N.M.), **83**, 487

Marine geophysics

Ocean-bottom seismograph observations on the Charlie-Gibbs fracture zone (Lilwall, R.C., Kirk, R.E.), **80**, 195
Least-squares fitting of marine seismic refraction data (Chapman, C.H., Orcutt, J.A.), **82**, 339

Mediterranean

Palaeomagnetic study of an allochthonous terraine: the Scisti Silicei Formation, Lagonegro Basin, Southern Italy (Incoronato, A., Tarling, D.H., Nardi, G.), **83**,m 721

Modelling

A matrix representation of the potential second-rank gradient tensor for local modelling (Soler, T.), **81**, 363

Mount St Helens

Excitation mechanism of atmospheric pressure waves from the 1980 Mount St Helens eruption (Mikumo, T., Bolt, B.A.), **81**, 445

Nigeria

Interpretation of aeromagnetic data across the central crystalline shield area of Nigeria (Ajakaiye, D.E., Hall, D.H., Millar, T.W.), **83**, 503

Nuclear explosions

Use of *P* coda for determination of yield of nuclear explosions (Gupta, I.N., Blandford, R.R., Wagner, R.A., Burnetti, J.A., McElfresh, T.W.), **83**, 541

Oceanography

A world-wide search for the 11 year old solar cycle in mean sea-level records (Woodworth, P.L.), **80**, 743
The self-consistent dynamic pole tide in global oceans (Dickman, S.R.), **81**, 157
Temporal variations of tides on the west coast of Great Britain (Amin, M.), **82**, 279

Pacific

The upper mantle beneath the north-east Pacific rim: a comparison with the Gulf of California (Walck, M.C.), **81**, 243
Anomalous Love-wave phase velocities in the Pacific: sequential pure-path and spherical harmonic inversion (Nishimura, C.E., Forsyth, D.W.), **81**, 389
Waveform inversion of seismic refraction data and applications to young Pacific crust (Shaw, P.R., Orcutt, J.A.), **82**, 375

Palaeointensities

Eastern Australian geomagnetic field intensity over the past 14000 yr (Constable C.G.), **81**, 121

Palaeomagnetism

Some statistical properties of palaeomagnetic directions in Icelandic lava flows (Kristjansson, L.), **80**, 57
Palaeomagnetism of Neogene Ocros dyke swarm, the Peruvian Andes: implication for the Bolivian orocline (Heki, K., Hamano, Y., Kono, M., Ui, T.), **80**, 527
Revision of the age of magnetization of the Montmartin red beds, Normandy, France (Perroud, H., Robardet, M., Van der Voo, R., Bonhommet, N., Paris, F.), **80**, 541
On 'The relationship between magnitude and direction of the geomagnetic field during the late Tertiary in Eastern Iceland' (Roberts, N., Shaw, J., Kristjansson, L.), **80**, 555
A new method of palaeofield magnitude correction for thermally altered samples and its application to Lower Carboniferous lavas (Rolph, T.C., Shaw, J.), **80**, 773
Drilling-induced remanence in carbonate rocks: occurrence, stability and grain-size dependence (Jackson, M., Van der Voo, R.), **81**, 75
Holocene geomagnetic secular variation records from north-eastern Australian lake sediments (Constable, C.G., McElhinny, M.W.), **81**, 103
Eastern Australian geomagnetic field intensity over the past 14000 yr (Constable C.G.), **81**, 121
Post-tectonic magnetizations from the Cordova gabbro, Ontario and Palaeozoic reactivation in the Grenville Province (Dunlop, D.J., Stirling, J.M.), **81**, 521
Non-linear processes in the geodynamo: palaeomagnetic evidence (McFadden, P.L., Merrill, R.T., McElhinny, M.W.), **83**, 111
Palaeomagnetism and *Rb-Sr* ages of the Ratagan and Comrie Intrusions (Turnell, H.B.), **83**, 363
Late Mesozoic and Cenozoic palaeomagnetism of Australia – I. A redetermined apparent polar wander path (Idnurm, M.), **83**, 399
Late Mesozoic and Cenozoic palaeomagnetism of Australia – II. Implications for geomagnetism and true polar wander (Idnurm, M.), **83**, 419
Palaeomagnetism of the Tudor gabro, Ontario: evidence for divergence between Grenvillia and interior Laurentia (Dunlop, D.J., Hyodo, H., Knight, T., Steele, A.G.), **83**, 699
Palaeomagnetic study of an allochthonous terraine: the Scisti Silicei Formation, Lagonegro Basin, Southern Italy (Incoronato, A., Tarling, D.H., Nardi, G.), **83**, 721
Step-wise and continuous thermal demagnetization and theories of thermoremanence (Schmidt, P.W., Clark, D.A.), **83**, 731
The angular dependence of rotational and anhysteretic remanent magnetization in rotating rock samples (Stephenson, A.), **83**, 787

Plate tectonics

Seismic detection of the untransformed 'basaltic' oceanic crust subducting into the mantle (Hori, S., Inoue, H., Fukao, Y., Ukawa, M.), **83**, 169
Fault movements and tectonics of eastern Iran: boundaries of the Lut plate (Nowroozi, A.A., Mohajer-Ashjai, A.), **83**, 215

Pleistocene

Comments on 'Pleistocene deglaciation and the Earth's rotation: a new analysis', by P. Wu and W.R. Peltier (Sabadini, R., Yuen, D.A., Boschi, E.), **83**, 555
Reply to 'Comments on 'Pleistocene deglaciation and the Earth's rotation: a new analysis' by Wu and Peltier' by Sabadini, Yuen and Boschi (Wu, P.), **83**, 559

Potential theory

Gravitational and magnetic fields of some simple solids of revolution (Parker, R.L., Shure, L.), **80**, 631

Precambrian

Post-tectonic magnetizations from the Cordova gabbro, Ontario and Palaeozoic reactivation in the

Grenville Province (Dunlop, D.J., Stirling, J.M.), **81**, 521
Palaeomagnetism of the Tudor gabro, Ontario: evidence for divergence between Grenvillia and interior Laurentia (Dunlop, D.J., Hyodo, H., Knight, T., Steele, A.G.), **83**, 699

Properties of rocks

Compressional and shear velocities of dry and saturated jointed rock: a laboratory study (Stesky, R.M.), **83**, 239

Resistivity sounding

Resistivity studies over the Flinders conductivity anomaly, South Australia (Constable, S.C.), **83**, 775

Scotland

Palaeomagnetism and *Rb-Sr* ages of the Ratagan and Comrie Intrusions (Turnell, H.B.), **83**, 363
Upper crustal shear velocity models from higher mode Rayleigh wave dispersion in Scotland (MacBeth, C.D., Burton, P.W.), **83**, 519

Sea level

A world-wide search for the 11-year solar cycle in mean sea-level records (Woodworth, P.L.), **80**, 743

Sedimentation

The effects of sedimentation and compaction on oceanic heat flow (Hutchison, I.), **82**, 439

Seismic anisotropy

Anisotropic propagation of *P*- and *S*-waves in the western Pacific lithosphere (Butler, R.), **81**, 89

Seismic attenuation

Comments on '*P*-wave amplitudes in the United States: east–west variations and variability', by Rhett Butler (Der, Z.A.), **81**, 381
P-wave amplitude variation between the eastern and western United States: reply to Z.A. Der (Butler, R.), **81**, 385
Multiple scattering and energy transfer of seismic waves – separation of scattering effect from intrinsic attenuation – I. Theoretical modelling (Wu, R.-S.), **82**, 57
Methodologies for estimating $t(\mathbf{f})$ from short-period body waves and regional variations of $t(\mathbf{f})$ in the United States (Der, Z.A., Lees, A.C.), **82**, 125

Seismic body waves

Travel times of *Pn*-waves in the Aegean and surrounding area (Panagiotopoulos, D.G., Papazachos, B.C.), **80**, 165
On the relative scattering of *P*-and *S*-waves (Malin, P.E., Phinney, R.A.), **80**, 603
Anisotropic propagation of *P*- and *S*-waves in the western Pacific lithosphere (Butler, R.), **81**, 89
The upper mantle beneath the north-east Pacific rim: a comparison with the Gulf of California (Walck, M.C.), **81**, 243
Comments on '*P*-wave amplitudes in the United States: east–west variations and variability', by Rhett Butler (Der, Z.A.), **81**, 381
P-wave amplitude variation between the eastern and western United States: reply to Z.A. Der (Butler, R.), **81**, 385
Estimating explosion yield by analytical waveform comparison (Lay, T.), **82**, 1
Inversion of seismic refraction data in planar dipping structure (Milkereit, B., Mooney, W.D., Kohler, W.M.), **82**, 103
Methodologies for estimating $t(\mathbf{f})$ from short-period body waves and regional variations of $t(\mathbf{f})$ in the United States (Der, Z.A., Lees, A.C.), **82**, 125

Seismic methods and surveys

Slowness time mapping of near offset seismic reflection data (Harding, A.J.), **80**, 463
Anisotrophy in the oceanic lithosphere – theory and observations from the Ngendei seismic regraction experiment in the south-west Pacific (Shearer, M P., Orcutt, J.), **80**, 493

Seismic sources

Imaging fault slip using teleseismic waveforms: analysis of a typical incomplete tomography problem (Menke, W.), **81**, 197
Elastic radiation from explosively loaded ellipsoidal cavities in an unbounded medium (Glenn, L.A., Ladd, A.J.C., Moran, B., Wilson, K.A.), **81**, 231
The first-order statistical moment of the seismic moment tensor (Kagan, Y.Y., Knopoff, L.), **81**, 429
Estimating explosion yield by analytical waveform comparison (Lay, T.), **82**, 1
Precise measurement of seismic travel times from an air gun source (Fletcher, J.B., Liu, H.), **82**, 549

Seismic structure

Detailed *S*-wave structure in the Dublin Basin and its northern margin (Murphy, N.P., Jacob, A.W.B.), **83**, 803

Seismic surface waves

A pertubation theory for Love waves in anelastic media (Madja, G. Chin, R.C.Y., Followill, F.E.), **80**, 1
Surface wave dispersion, crustal structure, and sediment thickness variation across the Barents shelf (Chan, W.W., Mitchell, B.J.), **80**, 329
Anomalous Love-wave phase velocities in the Pacific: sequential pure-path and spherical harmonic inversion (Nishimura, C.E., Forsyth, D.W.), **81**, 389
The Backus–Gilbert approach to the three-dimensional structure in the upper mantle – I. Lateral variation of surface wave phase velocity with its error and resolution (Tanimoto, T.), **82**, 105

Seismicity

The MARNET radiolinked seismometer network spanning the Marmara Sea and the seismicity of Western Turkey (Üçer, S.B., Crampin, S., Evans, R., Miller, S., Kafadar, N.), **83**, 17

Seismology

Estimation of the frequency dependence of Q from *ScP* and *ScS* phases (Burdick, L.J.), **80**, 35
A numerical study on the determination of the 3-D structure of the lithosphere by linear and non-linear inversion of teleseismic travel times (Koch, M.), **80**, 73
Kirchhoff-Helmholtz reflection seismograms in a laterally Inhomogeneous multi-layered elastic medium – I. Theory (Frazer, L.N., Sen, M.K.), **80**, 121
Ocean-bottom seismograph observations on the Charlie-Gibbs fracture zone (Lilwall, R.C., Kirk, R.E.), **80**, 195
Shear-coupled *PL* (Baag, C.-B., Langston, C.A.), **80** 363
An elliptical asperity in shear: fracture process and seismic radiation (Das, S., Kostrov, B.V.), **80**, 725
On the retrieval of pure path velocities from great circle data (Souriau, A.), **80**, 783
A seismic refraction study of the crustal structure associated with the Adamawa Plateau and Garoua Rift, Cameroon, West Africa, (Stuart, G.W., Fairhead, J.D., Dorbath, L., Dorbath, C.), **81**, 1
Anisotropic propagation of *P*- and *S*-waves in the western Pacific lithosphere (Butler, R.), **81**, 89
The determination of a layered acoustic medium via multiple impedance profile inversions from plane wave responses (Santosa, F., Symes, W.W.), **81**, 175
Imaging fault slip using teleseismic waveforms: analysis of a typical incomplete tomography problem (Menke, W.), **81**, 197
Application of the Gaussian beam method to elasticity theory (Katchalov, A.P., Popov, M.M.), **81**, 205
Elastic radiation from explosively loaded ellipsoidal cavities in an unbounded medium (Glenn, L.A., Ladd, A.J.C., Moran, B., Wilson, K.A.), **81**, 231
The upper mantle beneath the north-east Pacific rim: a comparison with the Gulf of California (Walck, M.C.), **81**, 243
Evidence against a discontinuity at the top of D'' (Schlittenhardt, J., Schweitzer, J., Müller, G.), **81**, 295
Comments on '*P*-wave amplitudes in the United States: east–west variations and variability', by Rhett Butler (Der, Z.A.), **81**, 381
P-wave amplitude variation between the eastern and western United States: reply to Z.A. Der (Butler, R.), **81**, 385
Anomalous Love-wave phase velocities in the Pacific: sequential pure-path and spherical harmonic inversion (Nishimura, C.E., Forsyth, D.W.), **81**, 389
The first-order statistical moment of the seismic moment tensor (Kagan, Y.Y., Knopoff, L.), **81** 429
The utility of regional Chinese seismograms for source and path studies in central Asia (Patton, H.J., Taylor, S.R., Harris, D.B., Mills (Jr), J.M.), **81**, 469
A confirmed earthquake in continental Antarctica (Adams, R.D., Hughes, A.A., Zhang, B.M.), **81**, 489
Seismic *P*-wave anisotropy in the subcrustal lithosphere of north-west Australia (Drummond, B.J.), **81**, 497
Inversion of a normally incident reflection seismogram by the Gopinath–Sondhi integral equation (Sarwar, A.K.M., Rudman, A.J.), **81**, 551
A seismological study of normal faulting in the Demirci, Alaşehir, and Gediz earthquakes of 1969-70 in western Turkey: implications for the nature and geometry of deformation in the continental crust (Eyidoğan, H., Jackson, J.), **81**, 569
Control of rupture by fault geometry during the 1980 El Asnam (Algeria) earthquake (Yielding, G.), **81**, 641
Estimating explosion yield by analytical waveform comparison (Lay, T.), **82**, 1
Multiple scattering and energy transfer of seismic waves – separation of scattering effect from intrinsic attenuation – I. Theoretical modelling (Wu, R.-S.), **82**, 57
Inversion of seismic refraction data in planar dipping structure (Milkereit, B., Mooney, W.D., Kohler, W.M.), **82**, 103
The Backus–Gilbert approach to the three-dimensional structure in the upper mantle – I. Lateral variation of surface wave phase velocity with its error and resolution (Tanimoto, T.), **82**, 105
Methodologies for estimating $\tilde{n}(f)$ from short-period body waves and regional variations of $\tilde{n}(f)$ in the United States (Der, Z.A., Lees, A.C.), **82**, 125
Range of validity of seismic ray and beam methods in general inhomogeneous media – I. General theory (Ben-Menahem, A., Beydoun, W.B.), **82**, 207
Range of validity of seismic ray and beam methods in general inhomogeneous media – II. A canonical problem (Beydoun, W.B., Ben-Menahem, A.), **82**, 235

Least-squares fitting of marine seismic refraction data (Chapman, C.H., Orcutt, J.A.), **82**, 339
Waveform inversion of seismic refraction data and applications to young Pacific crust (Shaw, P.R., Orcutt, J.A.), **82**, 375
Kirchhoff–Helmholtz reflection seismograms in a laterally inhomogeneous multi-layered elastic medium – II. Computations (Sen, M.K., Frazer, L.N.), **82**, 415
Source process and tectonic implications of the great 1975 North Atlantic earthquake (Lynnes, C.S., Ruff, L.J.), **82**, 497
Gaussian beams for surface waves in laterally slowly-varying media (Yomogida, K.), **82**, 511
Estimating maximum magnitude earthquakes in Iraq using extreme value statistics (Al-Abbasi, J.N., Fahmi, K.J.), **82**, 535
Precise measurement of seismic travel times from an air gun source (Fletcher, J.B., Liu, H.), **82**, 549
Analysis of records of local earthquakes: the Turkish Dilatancy Projects (TDP1 and TDP2) (Crampin, S., Evans, R., Üçer, S.B.), **83**, 1
The MARNET radiolinked seismometer network spanning the Marmara Sea and the seismicity of Western Turkey (Ucer, S.B., Crampin, S., Evans, R., Miller, S., Kafadar, N.), **83**, 17
Shear-wave polarizations on a curved wavefront at an isotropic free surface (Booth, D.C., Crampin, S.), **83**, 31
Shear-wave polarizations near the North Anatolian Fault - I. Evidence for anisotropy-induced shear-wave splitting (Booth, D.C., Crampin, S., Evans, R., Roberts, G.), **83**, 61
Shear-wave polarizations near the North Anatolian Fault - II. Interpretation in terms of crack-induced anisotropy (Crampin, S., Booth, D.C.), **83**, 75
Mapping of crustal heterogeneity in the North Sea basin via the propagation of *Lg*-waves (Kennett, B.L.N., Gregersen, S., Mykkeltveit, S., Newmark, R.), **83**, 299
Determination of the three-dimensional seismic structure of the crust and upper mantle in the Central Midlands of England (Maguire, P.K.H., Francis, D.J., Whitcombe, D.N.), **83**, 347
Partial derivatives of surface wave phase velocities for flat anisotropic models (Maupin, V.), **83**, 379
Caustics in seismology (Nye, J.F.), **83**, 477
Upper crustal shear velocity models from higher mode Rayleigh wave dispersion in Scotland (MacBeth, C.D., Burton, P.W.), **83**, 519
Use of *P* coda for determination of yield of nuclear explosions (Gupta, I.N., Blandford, R.R., Wagner, R.A., Burnetti, J.A., McElfresh, T.W.), **83**, 541
Source mechanisms and focal depths of East African earthquakes using Rayleigh-wave inversion and body-wave modelling (Shudofsky, G.N.), **83**, 563
Quasi-static crack models and the frictional stress threshold criterion for slip arrest (Bonafede, M., Dragoni, M., Boschi, E.), **83**, 625
The two-point correlation function of the seismic moment tensor (Kagan, Y.Y., Knopoff, L.), **83**, 637
Inversion of multimode surface wave data: evidence for sub-lithospheric anisotropy (Lévêque, J.-J., Cara, M.), **83**, 753
Focal mechanisms of aftershocks of the 1979 Carlisle earthquake: a re-interpretation (Marrow, P.C., Roberts, G.), **83**, 797
Detailed *S*-wave structure in the Dublin Basin and its northern margin (Murphy, N.P., Jacob, A.W.B.), **83**, 803
The great British earthquake of 1984 seen from afar (Trodd, H., Warburton P., Pooley, C.I.), **83**, 809

Solar constant

Cosmic spherules, asteroidal collisions and the possibility affecting changes in the solar constant (Parkin, D.W.), **83**, 683

Space geodesy

Tidal and rotational perturbations of Earth's gravity gradients (Bocchio, F.), **81**, 463

Statistical methods

Comment on: M.E. Beck's comment on 'Determination of the angle in a Fisher distribution which will be exceeded with a given probability' (McFadden, P.L.), **80**, 281
Comment on: M.E. Beck's comment on 'Determination of the angle in a Fisher distribution which will be exceeded with a given probability' (McFadden, P.L., Fisher, N.I.), **80**, 283
Reply to comments on McFadden and Fisher (Beck Jr. M.E.), **80**, 285

Subduction

Small-scale mantle flows and induced lithospheric stress near island arcs (Ward, S.N.), **81**, 409

Surface dynamics of the earth

The dynamics of rifting: deformation of the lithosphere by active and passive driving forces (Keen, C.E.), **80**, 95
Numerical models of subduction and forearc deformation (Tharp, T.M.), **80**, 419

Surface waves

Gaussian beams for surface waves in laterally slowly-varying media (Yomogida, K.), **82**, 511

Synthetic seismograms

Shear-wave polarizations on a curved wavefront at an isotropic free surface (Booth, D.C., Crampin, S.), **83**, 31

Gaussian beams, complex rays, and the analytic extension of the Green's function in smoothly inhomogeneous media (Wu, R.-S.), **83**, 93
An introduction to Maslov's asymptotic method (Thomson, C.J., Chapman, C.H.), **83**, 143
Synthetic *SH* seismograms in a laterally varying medium by the discrete wavenumber method (Campill, M., Bouchon, M.), **83**, 307

Tectonics

The dynamics of rifting: deformation of the lithosphere by active and passive driving forces (Keen, C.E.), **80**, 9
Ocean-bottom seismograph observations on the Charlie-Gibbs fracture zone (Lilwall, R.C., Kirk, R.E.), **80**, 195
Extremal inversion of static earth displacements due to volume sources (Vasco, D.W., Johnson, L.R.), **80**, 223
Thick-plate flexure re-examined (Wolf, D.),. **80**, 265
Palaeomagnetism of Neogene Ocros dyke swarm, the Peruvian Andes: implication for the Bolivian orocline (Heki, K., Hamano, Y., Kono, M., Ui, T.), **80**, 527
The evolution of the Gulf of Corinth (Greece): an aftershock study of the 1981 earthquakes (King, G.C.P., Ouyand, Z.X., Papadimitriou, P.D., Deschamps, A., Gagnepain, J., Houseman, G., Jackson, J.A., Soufleris, C., Virieus, J.), **80**, 677
Electrical conductivity anomalies and their relationship with the tectonics of South Australia (White, A., Polatayko, O.W.), **80**, 757
Tectonics of the Marmara Sea region of Turkey: new evidence from micro-earthquakes fault plane solutions (Evans, R., Asudeh, I., Crampiin, S., Üçer, S.B.), **83**, 47

Temperature-dependent viscosity

On the penetration of a hot diapir through a strongly temperature-dependent viscosity medium (Daly, S.F., Faefsky, A.), **83**, 657

The ninth UK geophysical assembly, **81**, 307

Thermal demagnetization

Step-wise and continuous thermal demagnetization and theories of thermoremanence (Schmidt, P.W., Clark, D.A.), **83**, 731

Three-dimensional analysis

The response of a three-dimensional magnetic and conductive body in shallow depth electromagnetic prospecting (Tabbagh, A.), **81**, 215

Tibet

On the thermal structure of the southern Tibetan crust (Jaupart, C., Francheteau, J., Shen, X.-J.), **81**, 131

Tides

Classification of tidal response in esturies from channel geometry (Prandle, D.), **80**, 209
The self-consistent dynamic pole tide in global oceans (Dickman, S.R.), **81**, 157
Temporal variations of tides on the west coast of Great Britain (Amin, M.), **82**, 279

Time domain

Porcessing electromagnetic data in the time domain (McMechan G.A., Barrodale, I.) **81**, 277

Tomography

Imaging fault slip using teleseismic waveforms: analysis of a typical incomplete tomography problem (Menke, W.), **81**, 197

Transient fields

Forerunners on conducting surfaces: the infinitesimal vertical magnetic dipole with displacement terms (Weir, G.J.), **81**, 19
Transient electromagnetic field above a permeable and conducting half-space (Ignetik, R., Thio, Y.-C., Westfold, K.C.), **81**, 623

Turkey

A seismological study of normal faulting in the Demirci, Alaşehir, and gediz earthquakes of 1969-70 in western Turkey: implications for the nature and geometry of deformation in the continental crust (Eyidoğan, H., Jackson, J.), **81**, 569

2-D model

A comparison of analytic and numerical results for a two-dimensional control model in electromagnetic induction – I. *B*-polarization calculations (Weaver, J.T., Le Quang, B.V., Fisher, G.), 82, 105

Upper mantle

The upper mantle beneath the north-east Pacific rim: a comparison with the Gulf of California (Walk, M.C.), **81**, 243
Small-scale mantle flows and induced lithospheric stress near island arcs (Ward, S.N.), **81**, 409

The Backus-Gilbert approach to the three-dimensional structure in the upper mantle - I. Lateral variation of surfaces wave phase velocity with its error and resolution (Tanimoto, T.), **82**, 105

USA

Comments on '*P*-wave amplitudes in the United States: east-west variations and veriability', by Rhett Butler (Der, Z.A.), **81**, 381
P-wave amplitude variation between the eastern and western United States: reply to Z.A. Der (Butler, R.), **81**, 385
Methodologies for estimating $t^*(f)$ from short-period body waves and regional variations of $t^*(f)$ in the United States (Der, Z.A., Lees, A.C.), **82**, 125

Viscous flow

Small-scale mantle flows and induced lithospheric stress near island arcs (ward, S.N.), **81**, 409

Viscoelasticity

Snell's law for viscoelastic materials (Wennerberg, L.), **81**, 13

Geophysical Journal of the Royal Astronomical Society

The subscription cost of the *Journal* in 1985 is as follows:

to Libraries and Institutions	in the UK	£235.00
	outside the UK	£270.00 (US $505.00*)
to individuals resident outside the United Kingdom who certify that the *Journal* is for their personal use only		£36.00 (US $68.00*)
to Fellows of the Geological Society of London		£22.50
to Fellows of the Royal Astronomical Society		£18.00
to Junior Members of the Society		£6.00

The prices of back numbers of the *Journal* are (per volume):

Vols 1–47 (1958–December 1976). Obtainable from the Royal Astronomical Society	£24.00
Vols 48–59 (1977–December 1980). Obtainable from the Royal Astronomical Society	£38.50
The following are obtainable from Blackwell Scientific Publications Ltd	
Vols 60–63	£43.75
Vols 64–67	£53.75
Vols 68–71	£55.00
Vols 72–75	£58.75
Vols 76–79	£66.25

* This price applies to the USA and Canada and includes the cost of accelerated surface post.

Membership of the Royal Astronomical Society

The annual contributions payable by members of the Royal Astronomical Society in 1985 are:

By Fellows aged 30 years and over	£30.00
Fellows under 30 years old	£20.00
Junior Members	£10.00

at 1985 January 1
